-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-15 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No.

09/461,402, filed on December 15, 1999. **Specification**

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 1-15 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 of U.S. Patent No. 6,710,894 (Ogawa) in view of U.S. Patent 5,798,845 (Baek et al.). Although the conflicting claims are not identical, they are not patentably distinct from each other

because the only difference between the pending claims 1-5 of the application and the allowed claims of the patent is that a memory in the application is configured to store default information as well as information regarding an identification of at least one user of the image data communication apparatus, while the memory in the patent is configured to store just the information regarding an identification of a user of the image data communication apparatus. In the application, default information is set into the mail message of an e-mail to which image data is attached when the information regarding the identification of the user is not selected by the panel section. However, it is well known in the art that a memory that stores user identification numbers for the transmission of image data can also store a default number, and that this default number can be attached to image information to be transmitted to a receiver when a user identification number is not entered. Baek et al. disclose this limitation (column 7, lines 44-67 (the default number is the automatic dialing number "FF")). It would have been obvious to one of ordinary skill in the art that by providing a default number, a user may be able to transmit image data, either on behalf of himself or herself, or on behalf of the company for which he or she works, and that a person receiving the image data can positively identify the company sending the image data even if a user at the transmitting end fails to enter identification information. Furthermore, with regard to pending claims 7 and 8, the method steps are performed by the apparatus of patent claims 1 and 5, respectively, with the exception of the storing and setting of default information, which, as related above, would have been an obvious modification to one of ordinary skill in the art. Moreover, pending claims 10, 11, 13 and 14 further recite a

transmitter (claim 10) and corresponding transmission step (claim 13), which reads on lines 2-6 of patent claim 1 and lines 3-4 of patent claim 5, respectively. Also, regarding claims 6, 9, 12 and 15, Baek et al. further disclose pre-storing (i.e., at any time prior to transmission of a document) the default information in the memory and the storing of information regarding the identification of the user in the memory by the user (column 4, line 59 – column 5, line 11).
